

HIBERNATION

REASON:

Some animals hibernate when food is limited. They lower their body temperature and “sleep” to save energy.

When an animal sleeps for a long time in the winter to save energy

<u>Under a Log</u>	<u>Bottom of a Pond</u>	<u>Trees</u>	<u>Den</u>	<u>In their Shells</u>	<u>Caves</u>
Ladybugs	Frog Turtle	Bees	Skunk Woodchuck	Snails	Bear Bat
